💼 PROFESSIONAL EXPERIENCE

2020 – 01/2022
Hamilton, Canada

Front End Hub Support
Canada Revenue Agency
Executed and contributed to full-stack development projects, with an emphasis on front-end features, browser manipulation, and cross-browser compatibility.
Built web page development from design to testing and up to production and deployment.
Built, planned, and managed rollout changes; provided mentoring and best practices for the Front end.
Worked with SOAP and RESTful web services using tools such as XML, JSON and RAML.
Worked in an Agile software development environment using methodologies such as Scrum.
Developed, optimize and maintain responsive web applications leveraging front-end development using HTML5, CSS3, JS frameworks and integration with 3rd party applications.
Built Web Components to bind web Services and re-use across multiple web applications.
Collaborated with cross-functional teams in strategy, research, analytics, UX, visual design, content & copy, DevOps.
Performed and coordinate complicated application programming activities. Design the application's technical infrastructure using specific databases, programming languages, utilities, and testing approaches.
Communicate and coordinate closely with team members and managers to ensure that deliverables are of high quality and on time.

🗂 PROJECTS

Real-Estate App
https://opyjoestate.vercel.app/
The App models a real-world real Estate application that makes use of a real Estate API. The App contains rental homes and properties for sale.

Ecommerce App
https://opyjo.github.io/opyjocommerce/
App models a real e-commerce app using redux for state management. It uses a fake products API to render the product on the page.
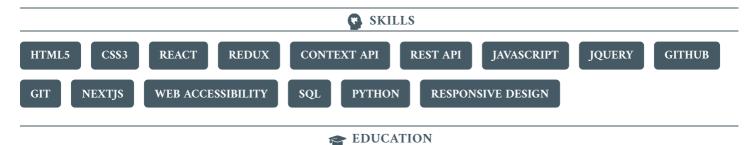

Pickflixx
https://opyjo.github.io/pickflixx/
The App shows a list of popular movies the users can watch. Users can also add movies to the watchlist and watched list

Woo Commerce
https://opyjo.github.io/Ecommerce/
The app is a single-page PSD conversion responsive design.
